

LANDPARK IDA

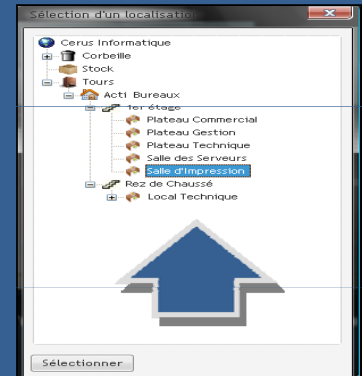

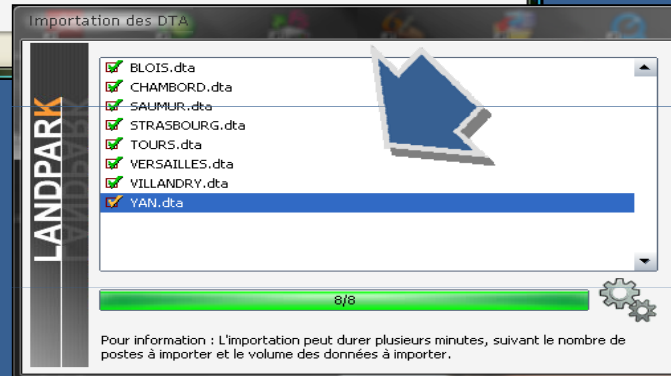

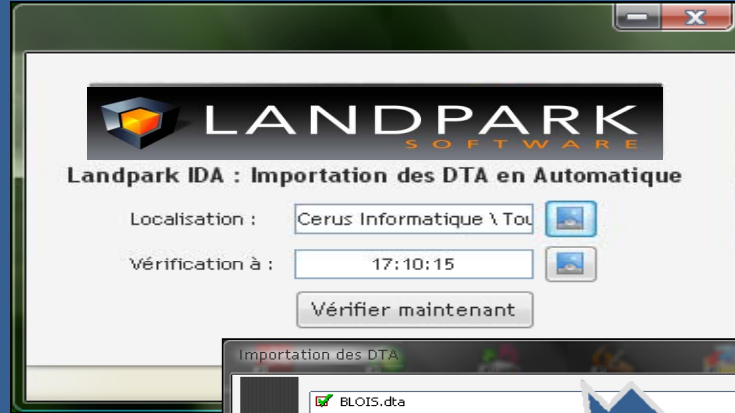

LANDPARK IDA

Import automatically your inventory results

With Landpark IDA (Automatic DTA Import), importing your inventory results can be configured to run seamlessly and automatically as a background process.

Landpark IDA relieves you from the lengthy process of importing your inventories manually into Landpark database(=> Tools menu – Inventory import, configure import settings => Location, asset type, then select the computers that need to be re-imported before saving their configuration to your database.

These operations need to be run every time your inventories are updated.

By using Landpark IDA, you can:

Set up automatic import options => Inventory check date, location.

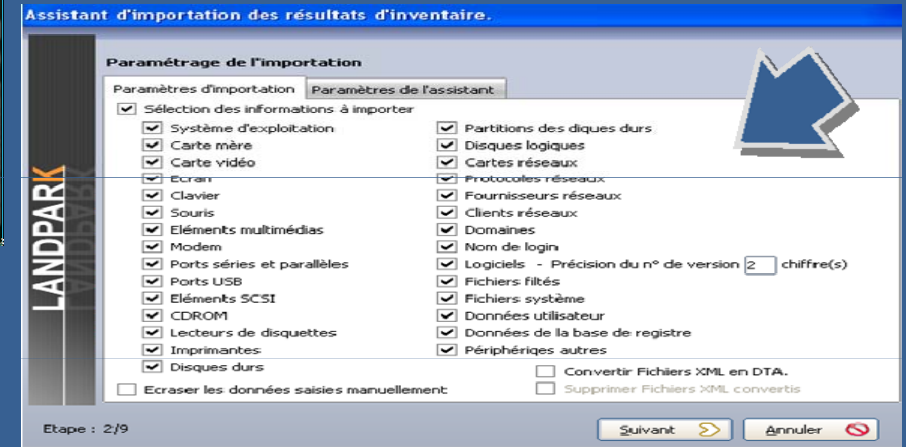

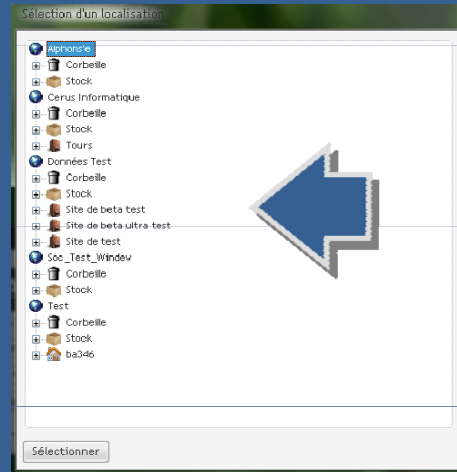

If the software needs to update already existing DTA files, you will no longer need to link older DTA files to their location since Landpark IDA is capable of detecting their location.

If the software inserts new DTA files, you will be prompted to link the new DTA files to an existing location within a treeview control (this step needs to be done only once).

LANDPARK IDA

Essential to save time in your inventory imports

- Landpark IDA is basically a program that automatically imports and updates your computer network data in your Landpark database.
- Scheduled checks are run every day at a specified time, detecting any new inventory result files (DTA) in your result folder.
- Previously you had to use Landpark to import inventory results, and during that time, no further action could be made.
- Now Landpark IDA imports your inventory results automatically and lets users focus on other tasks such as using other Landpark products.
- Landpark IDA is one of many Landpark modules that require Landpark to be installed.

- Landpark IDA also retrieves existing import settings from Landpark.
- For instance, Landpark IDA automatically takes into account the constraints and settings that were specified during the import phase in Landpark database, as shown in the picture on the right.

LANDPARK

A comprehensive Client Support Program

1

Treat each and every customer as unique

2

Provide them with our unique technical expertise
and knowledge

3

Address their requirements and validate
their expectations through our benchmarks

4

Landpark offers first-rate technical support
in order to meet your operational needs

**Landpark provides the kind of technical support that will help
your organization address the most complex operational requirements**

BENEFITS WITH OVERS 700,000 INSTALLED LICENSES

1

TECHNOLOGY

AN EXPERIENCE FOR OVER 20 YEARS

2

CUSTOMERS

OVER 700,000 INSTALLED LICENSES

3

LICENSES

AFFORDABLE PRICES

4

BENEFITS

With an expertise and a know-how recognized by thousands of accounts the quality of our Landpark tools allows IT Managers the most exhaustive and precise vision for their data-processing needs.
