

Ideal for fast and detailed analysis of your network elements

Carries out a complete inventory of the active elements of your network.

Carries out a complete inventory of your network

Landpark Snmp carries out a complete inventory of the active elements of your network (network printers, print servers hubs, routers ...) and any other Snmp devices in order to retrieve precise configuration information.

Snmp device information is transparently collected: result files are analyzed exhaustively to produce an accurate summary of the devices that were detected.

Ideal for fast and detailed analysis of your network elements

Landpark Snmp carries out a complete inventory of the active elements of your network (network printers print servers hubs, routers ...) and any other Snmp devices in order to retrieve precise configuration information.

of the devices that were detected.

Searching through an IP address range and visualize the results immediately

Quickly find and manage the exact configuration of your network elements by searching through an IP address range and visualize the results immediately before importing the information into your asset management software.

LANDPARK SNMP Display detailed information

Use our treeview-based asset explorer to display detailed information.

Our easily configurable interface allows you to export results to Excel or Txt formats for easier processing of your inventory items.
