HOW TO START INVENTORY WITH LANDPARK INVENTORY

Our expertise has been recognized by thousands of companies ...

LANDPARK INVENTORY

**IMPORTING YOUR INVENTORY RESULTS INTO LANDPARK MANAGER CAN BE DONE
IN ONE OF THE TWO FOLLOWING WAYS**

- **Landpark Network Ip:** installation of an agent on client computers, with Network IP Install to deploy agents first throughout the network

- **Landpark DoInventory:** this executable allows you to launch inventory operations on client computers via a connection script, without having to install the client/server modules

Inventory can be done in one of the two following ways

1st solution - installing agents on PCs

1/ Run « Network IP Install » to install agents on your PCs

2/ Start your inventories with « Network IP Console »

3/ Installing Network IP Client using a deployment script : you can configure your GPO to run a Network IP Client deployment script upon computer startup. Opting for this setup scenario will ensure that the client service is installed or updated on every computer listed in your GPO. Example : \\MY_SERVER\IPClients\LPLoaderIP.exe -h 192.168.1.2 -d "C:\

1/ NETWORK IP INSTALL

DEPLOY LANDPARK AGENTS ACROSS YOUR NETWORK (SCAN IP ADDRESSES, THEN EXECUTE ANY ACTION)

2/ NETWORK IP CONSOLE

ONCE THE AGENTS ARE DEPLOYED YOU CAN SET UP AND LAUNCH YOUR INVENTORY OPERATIONS

NETWORK IP INSTALL

NETWORK IP CONSOLE

REMOTE INVENTORY OPERATIONS

DEDICATED PORTS
TCP PORT: 2138
UDP PORT: 2140

IP CONSOLE CAN BE REPLICATED ACROSS SEVERAL SITES

Server 2 @IP 2

SITE 1 (CLIENT1.DTA)

SITE 2 (CLIENT1.DTA)

SITE 3 (CLIENT1.DTA)

NETWORK IP CONSOLE

Server 1 @IP 1

NETWORK IP CONSOLE REMOTE INVENTORY OPERATIONS

CENTRALIZES VARIOUS PC CONNECTIONS DEPLOYED ACROSS YOUR NETWORK

DoInventory is an executable that allows you to launch remote inventories on client workstations via a connection script, without having to install the client and server modules.

The inventory operation can for instance be launched upon login or scheduled to run every n days. The inventory engine is automatically selected according to the client operating system.

A log file is also created on the server in order to list the inventories that have been effectively carried out and the errors that may have occurred.

DoInventory command-line syntax:
DoInventory [-remoteLaunch | -pPLANIF] [-lLOCAL_PATH] [-rREMOTE_PATH] [-dDTA_PATH] [-nolog]

LANDPARK INVENTORY

- Landpark Inventory ensures a complete inventory of your data processing systems.

- User-friendly and easy to deploy, collects automatically all materials, software configurations and allow you to realize substantial savings.

- Our expertise has been recognized by thousands of companies.
