LANDPARK ACTIVE DIRECTORY / OPEN LDAP

Automatically integrate all user-related information into Landpark

Improve your productivity by integrating users information rapidly

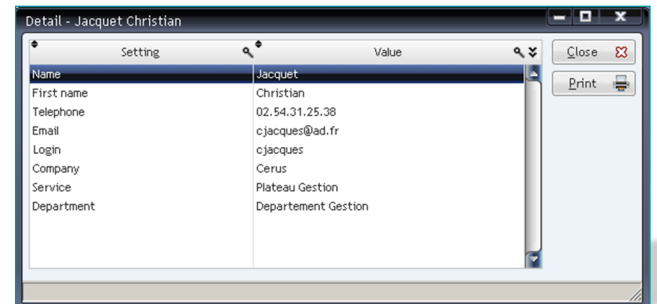

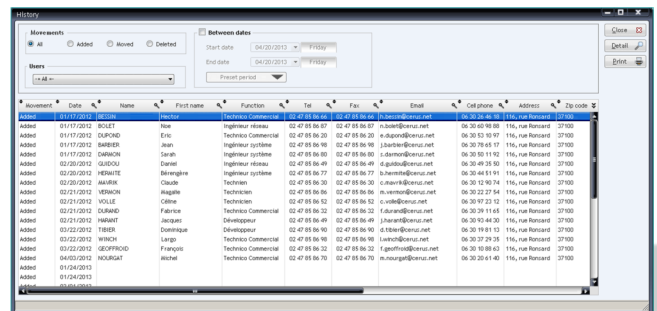

Reduce your data-processing administration tasks

SYNCHRONIZE LANDPARK USER DATABASE WITH ACTIVE DIRECTORY OR OPENLDAP

Landpark Active Directory / OpenLDAP makes it possible to view, filter, and publish changes that have occurred since the previous synchronization

- ▶ Filter by change: view and add any newly created users or remove any users that are no longer in your Active Directory.
- ▶ Filter by user: this option makes it possible to filter your list by user and publish all user changes.
- ▶ Filter by period: filter your list by date interval or select a preset period.
- ▶ Landpark Active Directory enables you to automatically and seamlessly integrate your user data into Landpark thanks to a treeview structure that displays organizational and location-based information.
- ▶ Possibility of setting up 3 different connection profiles.
- ▶ Exportable to Excel, Word, XML

Synchronize Landpark users list with your Active Directory/OpenLDAP
