- Organisational and geographic views of your hardware inventories give you rapid access to your IT assets.
- Comprehensive inventory of your hardware, software components and networks.
- Multiple-site treeview access.
- Manage your computers, CPUs, network cards, hard disk drives, printers, monitors peripherals and networks.
- User management (import users automatically and assign computers to your users).
- Transfer history.
- Manage your software licenses, software installations, and identify unwanted software via a dedicated alert panel.
- Retrieve Windows and Office license keys.
- Automatically import application information into your software reference database.
- Monitor changes and quickly view which elements were added or removed between inventories.
- History, metrics, queries, status reports, exportable to Word, Excel or HTML.
- Standard database formats (SQL Express and SQL Server).
- Graphical query tool with Excel exportable results.
- User-friendly and easy to deploy, our expertise recognized by thousands of clients.

SOLUTION FOR YOUR IT ASSET TRACKING NEEDS TO GAIN VISIBILITY AND CONTROL OF YOUR IT ASSETS

# LANDPARK INVENTORY

**LANDPARK  
TECHNOLOGY**

**Our technology also includes :**

- Landpark Manager (IT Asset Management)
- Landpark Helpdesk (Technical Support Management Tool)
- Landpark Snmp (collects information about your network's Snmp agents)
- Landpark Active Directory OpenLDAP (synchronize the Landpark user list with your Active Directory/OpenLDAP)

## EFFECTIVE COST CONTROL

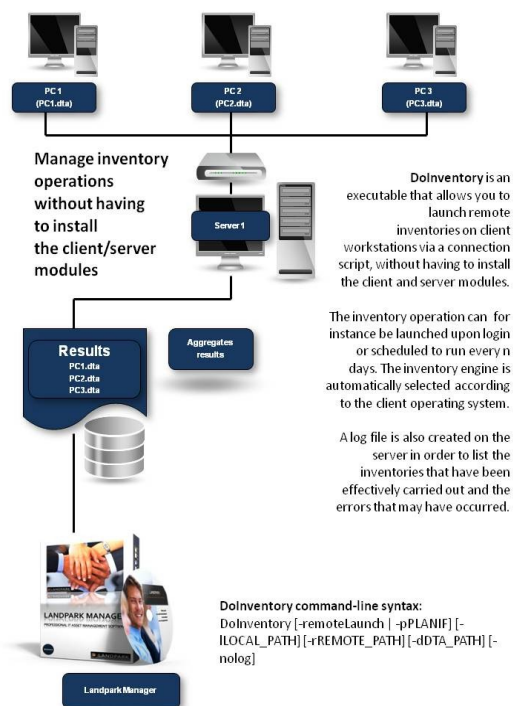

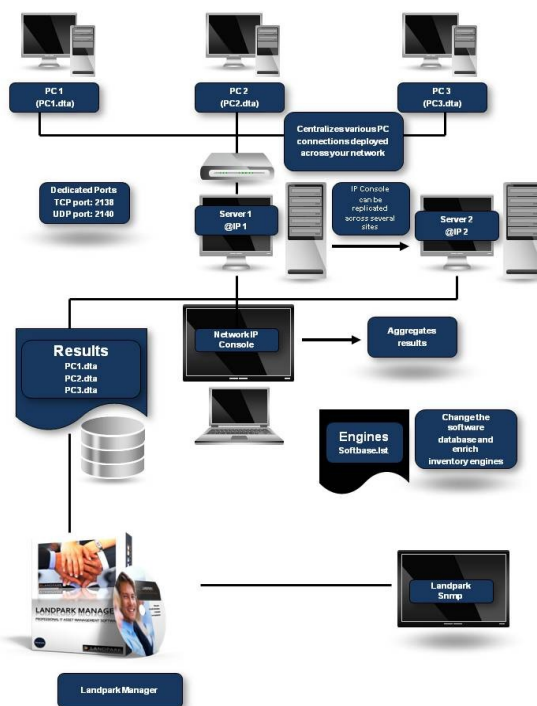

Our solution allows you to better control your company's acquisition costs, operating expenses, and technical support resources. Monitoring your IT assets more effectively increases user productivity while letting you focus on the appropriate decision-making processes.

## AN OFF-THE-SHELF SOLUTION

Monitor and upgrade your IT assets as new requirements come along, reduce implementation costs by tracking those items that are too expensive to maintain, manage software licenses more effectively.
