

LANDPARK IDA

**Your inventories imported as a background task
with Landpark Scanfree Pro**

SCANFREE IDA

IMPORT AUTOMATICALLY YOUR INVENTORY RESULTS

- With Scanfree IDA (Automatic DTA Import), importing your inventory results can be configured to run seamlessly and automatically as a background process.
- Scanfree IDA relieves you from the lengthy process of importing your inventories manually into Scanfree database(=> Tools menu – Inventory import, configure import settings => Location, asset type, then select the computers that need to be re-imported before saving their configuration to your database. These operations need to be run every time your inventories are updated.

By using Scanfree IDA, you can:

Set up automatic import options => Inventory check date, location.

If the software needs to update already existing DTA files, you will no longer need to link older DTA files to their location since Landpark IDA is capable of detecting their location.

If the software inserts new DTA files, you will be prompted to link the new DTA files to an existing location within a treeview control (this step needs to be done only once).

SCANFREE IDA

ESSENTIAL TO SAVE TIME IN YOUR INVENTORY IMPORTS

- Scanfree IDA is basically a program that automatically imports and updates your computer network data in your Scanfree database.
- Scheduled checks are run every day at a specified time, detecting any new inventory result files (DTA) in your result folder.
- Previously you had to use Scanfree to import inventory results, and during that time, no further action could be made.
- Now Scanfree IDA imports your inventory results automatically and lets users focus on other tasks such as using other Landpark products.
- Scanfree IDA is one of many Landpark modules that require Scanfree to be installed.

- Scanfree IDA also retrieves existing import settings from Landpark.
- For instance, Scanfree IDA automatically takes into account the constraints and settings that were specified during the import phase in Landpark database, as shown in the picture on the right.

Landpark SAS becomes today a major editor with significant number of solutions

THE COMPANY

LANDPARK provides you with the best IT Asset Management and help desk software, helping you achieve optimal management of your resources.

Hundreds of major companies have recognized our expertise in the field, IT managers have successfully been able to exert fine-grained control over their IT resources.
