You can **add** a new software application, **delete**, **hide** in order not to be taken during inventory, and make it **unwanted** in order to be notified from the alerts panel. You can also hide all application to start with an empty database.

The company

Founded in 1992, our company has acquired recognized expertise in PC software.

The company has since consolidated its technological proficiency with a practical approach by constantly analyzing the actual needs of its clients.

Since 1998, the company has consistently increased its presence in the world of IT asset management and has been a major international actor by successfully deploying its solutions in blue-chip corporations and administrations.

The company has always been keen on selecting the right technology for a successful development strategy.

Thousands of customers have already installed one of our products.

The technology

Our Landpark product range allows significant increases in productivity and a better implementation of IT asset management best practises thanks to the technical insight of our engineers.

Today, our company has become a major publisher with a large number of innovative solutions.

Our company dedicates a significant amount of its turnover to R&D.

Capitalizing on its customers' experience, its developers are constantly at the forefront of cutting-edge technology.
